## SHEET METAL PROGRAM

### HOW WOULD YOU LIKE TO LEARN A CAREER IN THE SHEET METAL INDUSTRY?

The term "sheet metal" refers to any metal that can be formed into flat pieces of varying thicknesses. Using specialized tools, sheet metal workers cut, roll, bend, and shape these pieces to make a wide variety of objects such as Ductwork, Airplane wings, Car bodies, Refrigeration units, Medical tables and storage units, Building facades, Steel sheets, Tubing and Signs.

Our students work with a contractor while they attend classes and many typically remain with the same employer throughout their apprenticeship training. They receive a combination of classroom and on-the-job training that enables them to progress in their chosen field. This combination offers students an outstanding opportunity to advance in their careers while they learn. And it helps ensure that the sheet metal industry has well-trained and educated workers.

### YOU CHOOSE!

#### A job

- PROVIDES A SALARY THAT MIGHT INCREASE
- LIMITS YOUR AREA OF RESPONSIBILITY
- GENERALLY LIMITS YOUR BUSINESS CONTACTS
- PROVIDES FEW CHALLENGES
- CAN OFTEN BE BORING
